	Peter Depypere, Partner Data Science & Analysis - element61	
Room switch	**Auditorium (ground floor)**	**Vision Room (first floor)**
14.30-15.00	**Showcasing Qlik Sense Saas, Qlik's modern cloud-based analytics solution** With a cloud-first approach, Qlik Sense SaaS utilizes the concept of zero-downtime deployments and allows focusing on solving business problems rather than administering your environment. With this key component of the Qlik Active Intelligence Platform you can build automatic workflows, create and distribute reports or deliver an analytics snapshot via Slack or Microsoft Teams. All through a state-of-the-art, no-code interface. Furthermore, you can receive up-to-the-minute data-driven alerts and use a lightweight solution to push your on-premises data to the cloud. **Reinout Lesage**, Qlik Analytics Architect - element61 **Petya Atanasova**, Qlik Analytics Architect - element61	**FIT - the Financial Insights Template that jumpstarts your Finance reporting** Creating the same financial reports in Excel every month? These days are over with the FIT (Financial Insights Template) for Qlik Sense from element61. We provide a one-time, out-of-the-box setup after which you are ready to go. Automated data flows from now on provide you with all required financial insights. And this for multi-company, multi-language, multi-ledger structures and no matter which accounting source system you use, including Exact, Exact Online and Dynamics BC. In this session, we will walk you through our standard financial reporting dashboards of the FIT solution, including balance sheet, P&L, financial ratios, credit management, cash flow monitoring, budget & forecasting and intercompany consolidation. **Sander Cornette**, Qlik Analytics Architect - element61
15.00 - 15.30	**Coffee Break (Event Hall - ground floor)**	
Room switch	**Auditorium (ground floor)**	**Vision Room (first floor)**
15.30-16.00	**How can Qlik Sense enable Self-Service BI ?** An ideal introduction session for people new to Qlik (Sense) and an excellent freshening up in terms of the unique USPs of Qlik. We'll explain concepts like self-service BI and the Associative Engine, and how to benefit from those in your organization using Qlik Sense. We give you more insights in Saas, Data lineage and Insights Advisor. Furthermore, we'll show you how to govern your datasets and hold grip on these beautiful self-service dashboards. **Thomas Peeters**, Qlik Analytics Architect - element61 **Radostina Abadzhimarinova**, Senior Qlik Analytics Architect - element61	**Introducing Komment, the write-back extension for Qlik Sense** Komment - certified by Qlik's Trusted Extension Developer Program - is a write-back extension for Qlik Sense. It allows Qlik Sense users to add and edit data directly within their dashboards. A great extension to enable what-if analysis or add comments to your numbers. Data updates are done in real time in the data-model, perfectly supporting concurrent sessions for multiple users. The built-in audit trail keeps track of all changes, giving a clear overview of who added, deleted, or changed data. Use case demonstrations: Do your sales budgeting in Qlik, Data categorization directly in your app, Do project management Kanban style, Monthly task tracking, Send custom mails using Komment and Qlik app automation **Daniel Andersen**, Director Products & Extensions - Komment / Extend BI

Room switch	Auditorium (ground floor)
16.00 - 16.30	**5 things you didn't know about Qlik Sense (yet)** In this session we bring you some undervalued features within Qlik Sense which we believe you might not know (yet)! The session contains a mix of recently introduced features by Qlik and stuff we only recently discovered ourselves ;-). Want to be impressed by what Qlik Sense can do, and take home some useful tips & tricks which you can implement at your own organization? Then this session is for you! **Thibault Verduyn**, Qlik Analytics Architect - element61
16.30 - 17.00	**VMZINC**　　**Customer Testimonial:**　　**APOK** **How APOK and VMZINC modernized its reporting platform with Qlik Sense** Fedrus International (APOK and VMZINC) is a Belgium-based, international building materials group, active in the production and distribution of roof & façade materials. Wannes Ballieu, Program Manager Reporting at Fedrus International, will share how the reporting team leveraged the possibilities and features of Qlik Sense during their QlikView to Qlik Sense migration. **Wannes Ballieu**, Program Manager Reporting – Fedrus International
17.00 - 18.00	**Networking Reception in the Event Hall (ground floor)**
